

Dumfries Academy

Faculty of Science

What do we do in S1 Science?

► In S1 Science you will study the following topics:

1. Biology - 1. Cells and Reproduction 2. Body Systems
2. Chemistry - 1. States of Matter 2. Elements, compounds and mixtures
3. Physics - 1. Light 2. Forces and electricity

What do we do in S1 Science?

- ▶ As we have all seen in recent weeks Science and Scientists are really important. Science helps us understand the world (and the universe) around us, it explains why things happen. Scientists do experiments that allow us to find solutions to questions and problems. Science has 3 main areas:
 1. Biology (the living world around us)
 2. Chemistry (substances, materials and how they behave)
 3. Physics (energy, matter and laws of the universe)

Extra curricular opportunities:

There is an S1 Science club that runs during Wednesday lunchtimes.

The Science faculty also usually run an S1 Science trip to the Glasgow Science Centre in December.

Meet the Science Faculty

Mr Grierson

- ▶ Principal Teacher (Science) - teaches Science and Biology

Miss Barton

- ▶ Principal Teacher (Laurie House) - teaches Science and Biology

Meet the Science Faculty

Dr Berry

- ▶ teaches Science and Biology

Miss Harrison

- ▶ teaches Science and Biology and Environmental Science

Meet the Science Faculty

Miss Desai

- ▶ teaches Science and Chemistry

Mr Viola

- ▶ teaches Science, Physics and Chemistry
